## OVERVIEW OF XIUS

XIUS was formed in 2000 with an aim to offer telecom solutions across the world. Starting with prepaid roaming in India, XIUS has over the last two decades, pioneered many solutions and has been a partner in progress, enabling businesses to stay ahead in an evolving digital landscape. Our expertise in Core Networks and Private Networks has empowered telecom providers worldwide to dream bigger and achieve more. XIUS is committed to helping deliver excellence and lead the way in telecom solutions.

---

## CORE PHILOSOPHY

At XIUS, ambition drives us—not just our ambition but the ambitions of our customers, who'll settle for nothing but the best. Growing together is a key part of our success mantra, and we are committed to empowering our clients with cutting-edge, scalable solutions that evolve with their needs, leading to our mutual growth.

By combining innovation with end-to-end deployment, we ensure a seamless experience for our clients, eliminating complexities and allowing them to focus on what matters — scaling their business.

Our solutions keep up with change, making global connectivity smarter, operations smoother, and growth limitless. Because at XIUS, ambition connects us.

---

## ACHIEVEMENTS & INNOVATION

From pioneering prepaid roaming in India and bringing cross-tech roaming to market to introducing the Americas to Hosted and Managed Prepaid Charging Platform, XIUS has been at the forefront of pushing the boundaries and knowledge in the telecom sector. XIUS has many patents to its credit and owns 100% of the IP used in its products and services.

---

## CUSTOMER-CENTRICITY

At XIUS, we believe your success is our success. Our long lasting relationships with clients is a testament to our unwavering commitment to deliver seamless, high-performance solutions that drive real business impact.

At every step of the process, we aim to reduce complexity while offering robust quality control, continuous support, and measurable outcomes. With XIUS, technology isn't just a service; it's a catalyst for growth, innovation, and long-term success.

## OUR PRODUCTS

### CORE NETWORKS

#### 1. Core Network as a Service (cNaaS)

XIUS cNaaS delivers a fully managed, AI-powered mobile core network solution, enabling telecom providers to rapidly launch, scale, and optimize their infrastructure. Designed for flexibility, it supports mobile, broadband, fixed wireless, and unified communications with seamless integration across 2G, 3G, 4G, and 5G technologies.

From next-gen 5G Core supporting SA and NSA networks to IP Multimedia Systems (IMS) powering carrier-grade VoLTE and VoNR, XIUS ensures seamless connectivity. Its 3G & 4G Core enhances operational efficiency, while the Evolved Packet Core (EPC) enables high-speed data, VoLTE, and network slicing for seamless evolution.

### PRIVATE NETWORKS

#### 1. Enterprise Private Networks

Delivers secure, reliable and end to end connectivity network tailored for enterprise automation, communication and Operational needs purpose built for your mission critical business needs.

#### 2. Secured Networks for Government

Provides reliable, 5G-optimized communication tailored for government agencies, ensuring secure connectivity across people, data, devices, and critical infrastructure.

### DIGITAL BSS

#### 1. Online Charging System (OCS)

Precision and reliability define our operations. From ideation to execution, we ensure seamless project delivery with robust quality control, continuous support, and measurable outcomes for our clients.

#### 2. eTopUp & Channel Manager

A market leading distribution network management platform enabling seamless product distribution, subscriber onboarding, service subscription management, payment collection, and eTopup for unified communication service providers, enabling real time visibility into product roll outs, market traction, sales and distribution performance, stock management and commission / incentive.

#### 3. Interconnect Billing (ICB)

A real-time, cloud-native solution that optimizes interconnect billing for voice, data, messaging and content services, ensuring revenue maximization, real time settlement, cost efficiency, and seamless compliance across 3G, 4G, and 5G networks.

#### 4. Netbuddy

A smart mobile app that empowers subscribers with real-time network diagnostics, identifying signal issues, call drops, and slow speeds for faster resolution.

## WHY CHOOSE XIUS?

Empowering businesses with technology, expertise, and unwavering support.

- XIUS designs and deploys end-to-end solutions for clients, so they can focus on their core business needs.
- Global leader in virtualized network, trusted by leading mobile operators like AT&T, Telefonica, Axiata, T-Mobile and many others.
- 100% pure play wireless focus with an end-to-end portfolio of award-winning products.
- 100% own IPR, telecom core network stack for 4G / 5G upgradable to 6G.
- Fully integrated end to end network solution – Core, applications, provisioning, network monitoring, payments, data intelligence, security.
- Core network platform that's trusted by operators and loved by enterprises to launch their virtual private networks.
- Open architecture based approach enables larger and broader ecosystems that foster collaboration to unlock the true potential of private networks.
- Highly scalable and flexible engagement modes address diverse needs of diverse customers.
- Faster time to market for customers to get up and running.
